SUJAN SETTEM

Business & Operations Analyst

Chicago, IL | (630) 362-6912 | sujansettem@gmail.com | linkedin.com/in/sujansettem | ssettem.github.io

SUMMARY

Business analyst with 5+ years across sales, operations and analytics, promoted twice at BYJU'S from sales associate to business analyst. Generated $200K+ in personal sales at BYJU'S, and at PropSquare ran Jira for 34 users across 5-6 teams while taking 100+ service tickets a week to closure. Equally comfortable pitching a client and fixing the process behind their tickets, with an M.S. in Business Analytics (GPA 3.83) and AI workflows in n8n and Claude tested against real data.

SKILLS

- **Business Analysis:** Requirements gathering (business and functional requirements documents), user stories & acceptance criteria, process improvement, SOPs, documentation
- **Operations & Program:** Project management (Agile sprints), Jira Cloud administration & automation, case management (Jira, IWMS ticketing), SLA tracking, vendor coordination, customer onboarding & training, stakeholder management
- **Data & BI:** Excel (pivot tables), Power BI, Tableau, SQL (basic), R (coursework), data modeling
- **Tools & AI:** Salesforce, Freshsales, LeadSquared, Jira (admin), Confluence, Slack, DocuSign, ChatGPT, Claude, Claude Code (MCP connectors & plugins), n8n, NotebookLM, Microsoft Word
- **Sales & Client:** Account management, client relationship building, B2B & B2C sales, sales training & coaching, pipeline management, pricing & ROI cases, contract review

EXPERIENCE

PropSquare LifeSpaces Management

Property and facility management for residential communities and commercial buildings

Business Analyst *Nov 2022 - Aug 2024*

- Configured Jira Cloud as one of the company's admins for 34 users across 5-6 teams (operations, HR, payroll, finance), building workflows, fields and permissions from each team's requirements; trained users and wrote the guides and SOPs.
- Managed 100+ service tickets a week (plumbing, electrical, maintenance, security), including issues from 70+ client WhatsApp groups; scheduled 15-20 on-ground staff daily, assigned vendors and confirmed every job was done.
- Automated a weekly Jira SLA dashboard for management (breach count and rate, at-risk tickets, time in each status) and a fortnightly Slack alert tagging staff with too many open tickets, improving accountability for ticket closure.
- Traced where work was stuck using that dashboard: 54% of 671 pending tickets were breaching SLA, with verification averaging 30 days against a 2-day target and client follow-up 35 days, giving leadership the evidence for which steps to fix.
- Rolled out QR-code digital attendance and task check-ins for ground staff across 6-7 sites using the company ERP and Jira, to stop proxy attendance and false "done" reports; standardized the Facility Manager end-of-day report.
- Prepared 10-12 Monthly Maintenance Reports a month for client review; analyzed Facility Manager reports for leadership and implemented the approved process changes in Jira.
- Pitched facility management services to builders and property owners, working referral and qualified leads in Freshsales and setting them up for sales reps to close.
- Halved weekly review time for 150+ customer-service logs by classifying them with ChatGPT.

BYJU'S

K-12 education technology company (learning app and school programs)

Business Analyst *Aug 2020 - Oct 2022*

- Supported sales reps on 35+ school and district deals contributing to $240K+ in school revenue, building bulk-licensing packages, low-cost plans for regional schools, ROI cases, live demos, contract reviews and teacher training.
- Turned needs from school stakeholders into 50+ user stories with Given/When/Then acceptance criteria and 2-3 BRDs/FRDs per school, including the business logic for sequential topic unlocking (90% quiz score required) after feedback showed students rushing through topics.
- Helped roughly double an 11-rep team's weekly revenue within 2 months (about $4K to $9K) by retraining their pitch and objection handling, piloting it on declined leads first; trained 40+ reps overall and defined hiring criteria.

- Built Tableau and Excel dashboards on call volume, target attainment and ticket resolution, and segmented leads across 7 cities by locality, income and occupation to focus outreach.

Senior Business Development Associate *Dec 2019 - Aug 2020*

Business Development Associate *Dec 2018 - Dec 2019*

- Generated $200K+ in revenue over 20 months, ranking among the top performers on a 20-rep team, through cold calls, in-home demos and family referrals; promoted to senior associate after 1 year.
- Owned the full sales cycle from first call through payment (no-cost installment plans, online payment processing, cashback verification) and post-purchase feedback that informed product improvements.

PROJECTS

AI Ops Triage Copilot (n8n + Claude API) Independent Project, 2026

github.com/ssettem/ai-ops-triage-copilot | n8n, Claude API, structured outputs, human-in-the-loop

- Built an n8n workflow that triages service tickets with Claude under a P1/P2/P3 SLA policy, sending P1s to alerts and low-confidence or repeat tickets to human review.
- Scored it on 40 hand-labeled tickets: 97.5% category accuracy, 10 of 11 emergencies caught, 100% P1 precision and a prompt-injection attempt resisted, at $0.49 per 100 tickets; traced the one miss to a gap in the rules.

90-Day Go-to-Market Roadmap: Healthcare AI Startup Business Case Study, 2026

Live site: veridian-roadmap.vercel.app | Built with Claude Code and Vercel from public Medicare data

- Applied B2B sales and sales-operations experience to design a 90-day go-to-market plan: scored 100 target accounts by fit and timing using public 2027 Medicare Star Ratings, mapped 5-person buying committees, and set targets of 20 meetings, 3 pilot proposals and 1 pilot.
- Configured Claude Code with MCP connectors and plugins for UI design, animation, web research and Vercel deployment, then built and published the plan as an interactive website with sample outreach emails, discovery questions and an ROI case for each buyer type.

F1 Cost-Cap Analytics: Forecasting & Predictive Modeling MS Capstone, Lewis University

R, Python, Tableau, SQL, Microsoft Word, NotebookLM (Gemini), AI coding assistants

- Led the forecasting and predictive-modeling work for a team capstone on 11 F1 seasons (2015-2025), using AI coding tools to build and test models, then selecting and interpreting the results; documented the methods in Word and used NotebookLM to plan the data story for the final presentation.
- Forecast team spending with ARIMA/ARIMAX (3.36% MAPE), tested cost-cap effects with Granger causality ($p = 0.02$, lag 2), and predicted championship points with Random Forest, beating a neural network (RMSE 103.5 vs 134.7).

AegisIQ Data Warehouse Design Graduate Coursework, Lewis University

- Designed a star-schema warehouse for a 150-staff, four-site organization, with source-system data mapping.

EDUCATION

M.S. Business Analytics, Lewis University | GPA 3.83/4.0 *Aug 2024 - May 2026*

B.Tech, Computer Science, Jawaharlal Nehru Technological University *Dec 2018*
