SUJAN SETTEM

Business & Operations Analyst

Chicago, IL | (630) 362-6912 | sujansettem@gmail.com | linkedin.com/in/sujansettem | ssettem.github.io

SUMMARY

Business analyst with 5+ years in sales and operations. Trained an 11-rep team, growing weekly revenue from $4K to $9K, led pre-sales for 60+ B2B deals and found why 54% of tickets ran late. Builds AI-assisted reports and workflows for stakeholders, tested before use.

SKILLS

- **Business Analysis:** Requirements gathering (BRDs/FRDs), user stories & acceptance criteria, process improvement, SOPs, documentation
- **Operations & Program:** Project management (Agile sprints), Jira Cloud administration & automation, case management (Jira, IWMS ticketing), SLA tracking, vendor coordination, customer onboarding & training, stakeholder management
- **Data & BI:** KPI dashboards & reporting, Excel (pivot tables), Power BI, Tableau, SQL (basic), R (coursework), data modeling
- **Tools & AI:** Salesforce, Freshsales, LeadSquared, Jira (admin), Confluence, Slack, DocuSign, ChatGPT, Claude, Claude Code (MCP connectors), n8n, NotebookLM, AI prompting & output validation
- **Sales & Client:** Account management, client relationship building, B2B & B2C sales, sales training & coaching, pipeline management, pricing & ROI cases, contract review

EXPERIENCE

PropSquare LifeSpaces Management — Property & facility management (residential and commercial)
Business Analyst | PropSquare — *Mar 2022 – Aug 2024*

Operations & Service Delivery

- Drove 100+ service tickets a week to closure, including issues from 70+ client accounts, by scheduling 15+ field staff daily and assigning vendors.
- Digitized field-staff attendance across 40+ client sites, giving managers verified attendance in real time, by replacing paper registers with QR-code check-ins on the company ERP and Jira.
- Delivered 10+ Monthly Maintenance Reports a month with consistent quality across client sites by standardizing Facility Managers' end-of-day reports.

Systems, Automation & Reporting

- Standardized how 5+ teams (34 users) tracked work in Jira by building workflows from stakeholder requirements as an admin and training users with SOPs.
- Gave leadership a weekly view of overdue service tickets (SLA breach rate, time in status), which managers used to move staff to busy areas at peak hours, by automating a Jira dashboard and Slack alerts.
- Identified the main SLA bottleneck by analyzing 671 pending tickets: 54% had breached SLA, with verification averaging 30 days against a 2-day target.
- Ensured accurate payroll, paying staff only for days and work completed, by moving held-salary and attendance-based pay adjustments from spreadsheets into a Jira workflow.

Business Development & Customer Insight

- Built a pipeline of qualified real estate developer and property owner prospects by pitching facility services and qualifying referral leads in Freshsales.
- Halved weekly review time for 150+ customer-service logs, from 8–10 hours to 4–5, by classifying them with ChatGPT.

BYJU'S — K-12 education technology (B2B school programs and B2C learning platform)
Business Analyst | BYJU'S — *Aug 2020 – Mar 2022*

Pre-Sales & Account Support

- Led pre-sales for 60+ school deals ($240K+ revenue) as the main contact for school directors and principals, preparing demos, licensing packages, ROI cases and contract reviews.
- Supported school accounts after the sale by coordinating sales, product, IT and risk stakeholders to escalate bugs, set up school support and flag payment discrepancies.

Requirements & Analytics

- Translated school needs into 50+ user stories with acceptance criteria and 2+ BRDs/FRDs per school, including a rule that unlocked the next topic only after a 90% quiz score, added because students were rushing ahead.
- Focused sales outreach across 7 cities by segmenting leads by locality, income and occupation and building Tableau and Excel KPI dashboards on call volume, target attainment and ticket resolution.

Sales Enablement & Training

- Trained an 11-rep team on a new pitch, piloted first on declined leads, increasing their weekly revenue from about $4K to $9K in 2 months; 8 of 11 reps improved.
- Scaled the program to 40+ reps on pitch and objection handling and set hiring criteria for new sales associates.

Senior Business Development Associate | BYJU'S *Dec 2019 – Aug 2020*

Quota Attainment & Pipeline Growth

- Delivered $200K+ in sales across both roles in 20 months, ranking among the top performers on a 20-rep team, by converting higher-value qualified leads against a larger senior quota.
- Built a B2B school pipeline by presenting ROI cases to school decision-makers: higher grades and rankings at below-tuition cost through self-paced learning and mock exams.

Pricing Strategy & Customer Retention

- Raised deal value and won price-sensitive buyers by building tiered pricing, from about 50% off to 3x+ premium packages, using LeadSquared CRM data and customer feedback.
- Kept customers by managing the full sales cycle from first call to payment, including installment plans, and resolving post-sale issues.

Business Development Associate | BYJU'S *Dec 2018 – Dec 2019*

Prospecting & Consultative Sales

- Generated about $100K in first-year sales through outbound prospecting, consultative product demos and referral selling, earning promotion to senior in 12 months.
- Recommended the right product across four product lines by running customer needs assessments, covering early learning, grades 1 to 10, and college-entrance and civil-service exam prep.

PROJECTS

AI Ops Triage Copilot (n8n + Claude API) Independent Project, 2026

github.com/ssettem/ai-ops-triage-copilot | n8n, Claude API, structured outputs, human-in-the-loop

- Built an automated ticket-triage workflow in n8n where Claude sorts tickets under P1/P2/P3 SLA rules, sending P1s to alerts and uncertain or repeat tickets to a person.
- Validated it on 40 hand-labeled tickets: 97.5% category accuracy, 10 of 11 emergencies caught, 100% P1 precision and $0.49 per 100 tickets, resisting a prompt-injection attempt.

90-Day Go-to-Market Roadmap: Healthcare AI Startup Business Case Study, 2026

Live site: veridian-roadmap.vercel.app | Built with Claude Code and Vercel from public Medicare data

- Scored 100 target accounts by fit and timing from public 2027 Medicare Star Ratings and mapped 5-person buying committees, from signer and champion to IT security.
- Set 90-day targets of 20 meetings, 3 pilot proposals and 1 pilot, with outreach emails and ROI cases.

F1 Cost-Cap Analytics: Forecasting & Predictive Modeling MS Capstone, Lewis University

github.com/ssettem/f1-racing-bi | R, Python, Tableau, SQL, NotebookLM (Gemini), AI coding assistants

- Forecast sponsorship revenue within 3.36% average error (ARIMA) and showed the cost cap's effect appeared two years later (Granger test, $p = 0.02$).
- Predicted championship points more accurately with a Random Forest than a neural network (RMSE 103.5 vs 134.7).

AegisIQ Reporting Data Warehouse Graduate Coursework, Lewis University

Rebuilt with synthetic data: four-site video-game coaching business | github.com/ssettem/aegisiq-warehouse

- Combined four sites' data into a star-schema reporting database (about 70,000 rows) with an AI-assisted Python ETL that standardized 767 site names and removed 142 duplicates.
- Found 41 unpaid sessions (1.4%) and one site's coaches overbooked in 13 of 25 weeks using a weekly quality check and four SQL queries.

EDUCATION & CERTIFICATIONS

Master of Science (M.S.), Business Analytics, Lewis University | GPA 3.83/4.0 *Aug 2024 – May 2026*

Bachelor of Technology (B.Tech), Computer Science, Jawaharlal Nehru Technological University *Dec 2018*

- **Google Ads AI-Powered Performance Certification**, Google Skillshop (ID: 198232664)
- **Six Sigma White Belt**, Council for Six Sigma Certification (ID: FLfOWslHQT)
