SUJAN SETTEM

Business & Operations Analyst

Chicago, IL | (630) 362-6912 | sujansettem@gmail.com | linkedin.com/in/sujansettem

SUMMARY

Business and operations analyst with 5+ years across B2B/B2C sales, sales analytics and operations. Promoted twice at BYJU'S, from sales associate to business analyst: generated $200K+ in revenue, supported 35+ school deals, and helped double a sales team's weekly revenue through pitch training. At PropSquare, cut monthly reporting from 6-8 hours to under 30 minutes with Power Query and Power BI. Works in cross-functional, customer-facing roles across sales, product, IT and operations. M.S. in Business Analytics, GPA 3.83.

SKILLS

- **Business Analysis:** Requirements gathering (business and functional requirements documents), user stories & acceptance criteria, process improvement, SOPs, documentation
- **Operations & Program:** Project management (Agile sprints), vendor management & SLAs, case management (Jira, IWMS), customer onboarding & training, stakeholder management
- **Data & BI:** Excel (Power Query, pivot tables), Power BI, Tableau, SQL (basic), R (coursework), data modeling
- **Tools & AI:** Salesforce, Freshsales, LeadSquared, Jira (admin), Confluence, Slack, DocuSign, ChatGPT, Claude, Claude Code (MCP connectors & plugins), n8n
- **Sales & Client:** Account management, client relationship building, B2B & B2C sales, sales training & coaching, pipeline management, pricing & ROI cases, contract review

EXPERIENCE

PropSquare LifeSpaces Management

Property and facility management for residential communities and commercial buildings

Business Analyst (Operations & Process) *Nov 2022 - Aug 2024*

- Cut monthly reporting prep from 6-8 hours to under 30 minutes by building a Power Query workflow that merged 12 inconsistent building rent rolls into one Power BI dataset, eliminating copy-paste errors.
- Reduced weekly leasing pipeline report prep from 4 hours to 1 hour with a Power Query template that cleaned, de-duplicated and matched CRM exports to agent activity logs.
- Halved weekly review time for 150+ customer-service logs (call notes, tenant feedback, walkthrough reports, vendor audits), from 8-10 hours to 4-5, by classifying them through the company's ChatGPT business account.
- Built and owned Jira workflows for 15+ users handling 40-50 service tickets a week across 3-4 managed properties, replacing scattered messages with tracked status from intake to verified resolution; trained 15+ staff with an internal guide I wrote.
- Scheduled 15-20 field and operations staff daily and tracked SLAs for 5-8 facility vendors; built ticket-status reports that stakeholders (property managers, operations directors) used to shift staff to high-traffic zones during peak hours.

BYJU'S

K-12 education technology company (learning app and school programs)

Business Analyst *Aug 2020 - Oct 2022*

- Supported sales reps on 35+ school and district deals (national and state-curriculum schools) across a metro region and surrounding districts, contributing to $240K+ in school revenue, by building multi-grade bulk-licensing packages, low-cost plans for regional schools, ROI cases, live demos, contract reviews, and post-sale onboarding with teacher training.
- Turned needs from school stakeholders into 50+ user stories with Given/When/Then acceptance criteria and 2-3 BRDs/FRDs per school, including the business logic for sequential topic unlocking (90% quiz score required) after feedback showed students rushing through topics.

- Helped roughly double an 11-rep team's weekly revenue within 2 months (about $4K to $9K) by retraining their pitch and objection handling, piloting it on declined leads first; trained 40+ reps overall and defined hiring criteria.
- Built Tableau and Excel dashboards on call volume, target attainment and ticket resolution, and segmented leads across 7 cities by locality, income and occupation to focus outreach.

Senior Business Development Associate *Dec 2019 - Aug 2020*
Business Development Associate *Dec 2018 - Dec 2019*

- Generated $200K+ in revenue over 20 months, ranking among the top performers on a 20-rep team, through cold calls, in-home demos and family referrals; promoted to senior associate after 1 year.
- Owned the full sales cycle from first call through payment (no-cost installment plans, online payment processing, cashback verification) and post-purchase feedback that informed product improvements.

PROJECTS

90-Day Go-to-Market Roadmap: Healthcare AI Startup Business Case Study, 2026
Live site: veridian-roadmap.vercel.app | Built with Claude Code and Vercel from public CMS data

- Applied my B2B sales and sales-operations experience to design a 90-day go-to-market plan: scored 100 target accounts by fit and timing using public 2027 Medicare Star Ratings, mapped 5-person buying committees, and set targets of 20 meetings, 3 pilot proposals and 1 pilot.
- Configured Claude Code with MCP connectors and plugins for UI design, animation, web research and Vercel deployment, then built and published the plan as an interactive website with sample outreach emails, discovery questions and an ROI case for each buyer type.

AI Ticket Triage Workflow (n8n + Claude API) Independent Project, 2026
n8n, Claude API, JavaScript, structured outputs

- Built an n8n workflow that classifies property-maintenance tickets by category and priority with the Claude API, routes each to the right team and emails a summary with urgent tickets first.
- Measured accuracy against 30 hand-labeled tickets, with declined or unreadable answers flagged for human review instead of failing the run.

F1 Cost-Cap Analytics: Forecasting & Predictive Modeling MS Capstone, Lewis University
R, Python, Tableau, SQL, AI coding assistants

- Led the forecasting and predictive-modeling work for a team capstone on 11 F1 seasons (2015-2025), using AI coding tools to build and test models, then selecting and interpreting the results.
- Forecast team spending with ARIMA/ARIMAX (3.36% MAPE), tested cost-cap effects with Granger causality ($p = 0.02$, lag 2), and predicted championship points with Random Forest, which beat a neural network (RMSE 103.5 vs 134.7).

AegisIQ Data Warehouse Design Graduate Coursework, Lewis University
Star-schema dimensional modeling

- Designed a star-schema data warehouse for a 150-staff organization across four sites, including source-to-target data mapping and system requirements.

EDUCATION

Lewis University Romeoville, IL
M.S. Business Analytics | GPA 3.83/4.0 *Aug 2024 - May 2026*

Jawaharlal Nehru Technological University
B.Tech, Computer Science *Dec 2018*

CERTIFICATIONS

- **Six Sigma White Belt**, Council for Six Sigma Certification | ID: FLfOWslHQT *Oct 2026*
