SUJAN SETTEM

Business & Operations Analyst

Chicago, IL | (630) 362-6912 | sujansettem@gmail.com | linkedin.com/in/sujansettem | ssettem.github.io

SUMMARY

Business analyst with 5+ years who started in sales, moved into analysis at BYJU'S, then ran operations at PropSquare. Generated $200K+ in personal sales and supported 35+ school deals at BYJU'S, then at PropSquare ran Jira for 34 users across 5-6 teams and 100+ service tickets a week. Equally comfortable pitching a client, aligning stakeholders and fixing the process behind their tickets, with an M.S. in Business Analytics (GPA 3.83) and AI workflows in n8n and Claude tested against real data.

SKILLS

- **Business Analysis:** Requirements gathering (business and functional requirements documents), user stories & acceptance criteria, process improvement, SOPs, documentation
- **Operations & Program:** Project management (Agile sprints), Jira Cloud administration & automation, case management (Jira, IWMS ticketing), SLA tracking, vendor coordination, customer onboarding & training, stakeholder management
- **Data & BI:** KPI dashboards & reporting, Excel (pivot tables), Power BI, Tableau, SQL (basic), R (coursework), data modeling
- **Tools & AI:** Salesforce, Freshsales, LeadSquared, Jira (admin), Confluence, Slack, DocuSign, ChatGPT, Claude, Claude Code (MCP connectors & plugins), n8n, NotebookLM, Microsoft Word
- **Sales & Client:** Account management, client relationship building, B2B & B2C sales, sales training & coaching, pipeline management, pricing & ROI cases, contract review

EXPERIENCE

PropSquare LifeSpaces Management Nov 2022 - Aug 2024

Property and facility management (residential and commercial)

Business Analyst *Nov 2022 - Aug 2024*

- Drove 100+ service tickets a week to closure, including issues from 70+ client WhatsApp groups, by scheduling 15 to 20 on-ground staff daily and dispatching vendors same-day.
- Standardized how 5-6 teams (34 users) tracked work in Jira by building workflows from stakeholder requirements as an admin and training users with SOPs.
- Gave leadership weekly visibility into SLA KPIs (breach rate, time in status) by automating a Jira dashboard and Slack alerts tagging owners of overdue tickets.
- Pinpointed the main bottleneck: 54% of 671 pending tickets breached SLA, with verification averaging 30 days against a target of 2 days.
- Replaced paper attendance registers at 6-7 sites with QR-code check-ins on the company ERP and Jira, giving managers verified, real-time attendance data.
- Automated payroll's held-salary and full-and-final settlement tracking by moving it from spreadsheets into a Jira workflow where cases linked and closed automatically.
- Delivered 10-12 Monthly Maintenance Reports a month and standardized Facility Managers' end-of-day reports, so every client site got consistent reporting.
- Built a pipeline of qualified prospects for business development by pitching facility services to builders and property owners and qualifying referral leads in Freshsales.
- Halved weekly review time for 150+ customer-service logs by classifying them with ChatGPT.

BYJU'S Dec 2018 - Oct 2022

K-12 education technology (learning app and school programs)

Business Analyst *Aug 2020 - Oct 2022*

- Contributed to $240K+ across 35+ school and district deals by opening pitches with directors and principals, then preparing demos, licensing packages, ROI cases and contract reviews.
- Protected school accounts after the sale by coordinating sales, product, IT and risk stakeholders to escalate bugs, set up school support and flag payment discrepancies.
- Translated school needs into 50+ user stories with acceptance criteria and 2-3 BRDs/FRDs per school, including logic that unlocked topics after a 90% quiz score.

- Helped roughly double an 11-rep team's weekly revenue in 2 months (about $4K to $9K) by retraining their pitch, piloting it on declined leads first.
- Trained 40+ reps on pitch and objection handling and set hiring criteria for new sales associates.
- Built Tableau and Excel KPI dashboards tracking sales call volume, target attainment and ticket resolution.

Senior Business Development Associate *Dec 2019 - Aug 2020*

- Delivered $200K+ in sales across both roles in 20 months, converting higher-value qualified leads against a larger senior quota as a top performer.
- Analyzed LeadSquared CRM exports and customer feedback to segment buyers, then tailored pricing: town packages about 50% off, city packages 3x+ with live-class add-ons.
- Opened a new school-lead channel by running on-site product demos, adding lead generation to direct selling.
- Owned full-cycle sales from lead to payment, including no-cost installment financing, and followed up after each sale until customer issues were resolved.

Business Development Associate *Dec 2018 - Dec 2019*

- Generated about $100K in first-year sales through outbound prospecting, in-home product demos and referral selling, earning promotion to senior in 12 months.
- Matched each family to the right product across a four-line portfolio: Disney-partnered early learning, grades 1 to 10, college-entrance and civil-service exam prep.

PROJECTS

AI Ops Triage Copilot (n8n + Claude API) Independent Project, 2026

github.com/ssettem/ai-ops-triage-copilot | n8n, Claude API, structured outputs, human-in-the-loop

- Built an n8n workflow that triages service tickets with Claude under a P1/P2/P3 SLA policy, sending P1s to alerts and uncertain or repeat tickets to human review.
- Scored it on 40 hand-labeled tickets: 97.5% category accuracy, 10 of 11 emergencies caught, 100% P1 precision and a prompt-injection attempt resisted, at $0.49 per 100 tickets; traced the one miss to a gap in the rules.

90-Day Go-to-Market Roadmap: Healthcare AI Startup Business Case Study, 2026

Live site: veridian-roadmap.vercel.app | Built with Claude Code and Vercel from public Medicare data

- Applied B2B sales and sales-operations experience to design a 90-day go-to-market plan: scored 100 target accounts by fit and timing using public 2027 Medicare Star Ratings, mapped 5-person buying committees, and set targets of 20 meetings, 3 pilot proposals and 1 pilot.
- Configured Claude Code with MCP connectors and plugins for UI design, animation, web research and Vercel deployment, then built and published the plan as an interactive website with sample outreach emails, discovery questions and an ROI case for each buyer type.

F1 Cost-Cap Analytics: Forecasting & Predictive Modeling MS Capstone, Lewis University

github.com/ssettem/f1-racing-bi | R, Python, Tableau, SQL, Microsoft Word, NotebookLM (Gemini), AI coding assistants

- Led the forecasting and predictive-modeling work for a team capstone on 11 F1 seasons (2015-2025), using AI coding tools to build and test models, then selecting and interpreting the results; documented the methods in Word and used NotebookLM to plan the data story for the final presentation.
- Forecast sponsorship revenue with ARIMA (3.36% MAPE), tested the cost cap's lagged effect with Granger causality ($p = 0.02$, lag 2), and predicted championship points with Random Forest, beating a neural network (RMSE 103.5 vs 134.7).

AegisIQ Reporting Data Warehouse Graduate Coursework, Lewis University

Course case: Dota 2 coaching-analytics business, 150 staff, four sites | ER diagram, star schema

- Designed one shared reporting database for a Dota 2 coaching business, so four sites reported player performance, coaching sessions, revenue and staffing from the same numbers.
- Drew the ER diagram of tables, keys and relationships first, then built the star schema and wrote the data mapping from each source system.

EDUCATION

M.S. Business Analytics, Lewis University | GPA 3.83/4.0 *Aug 2024 - May 2026*

B.Tech, Computer Science, Jawaharlal Nehru Technological University *Dec 2018*
