SUJAN SETTEM

Business & Operations Analyst

Chicago, IL | (630) 362-6912 | sujansettem@gmail.com | linkedin.com/in/sujansettem | ssettem.github.io

SUMMARY

Business analyst with 5+ years across sales, operations and analytics, promoted twice at BYJU'S from sales associate to business analyst. Generated $200K+ in personal sales at BYJU'S, and at PropSquare ran Jira for 34 users across 5-6 teams while taking 100+ service tickets a week to closure. Equally comfortable pitching a client and fixing the process behind their tickets, with an M.S. in Business Analytics (GPA 3.83) and AI workflows in n8n and Claude tested against real data.

SKILLS

- **Business Analysis:** Requirements gathering (business and functional requirements documents), user stories & acceptance criteria, process improvement, SOPs, documentation
- **Operations & Program:** Project management (Agile sprints), Jira Cloud administration & automation, case management (Jira, IWMS ticketing), SLA tracking, vendor coordination, customer onboarding & training, stakeholder management
- **Data & BI:** KPI dashboards & reporting, Excel (pivot tables), Power BI, Tableau, SQL (basic), R (coursework), data modeling
- **Tools & AI:** Salesforce, Freshsales, LeadSquared, Jira (admin), Confluence, Slack, DocuSign, ChatGPT, Claude, Claude Code (MCP connectors & plugins), n8n, NotebookLM, Microsoft Word
- **Sales & Client:** Account management, client relationship building, B2B & B2C sales, sales training & coaching, pipeline management, pricing & ROI cases, contract review

EXPERIENCE

PropSquare LifeSpaces Management

Property and facility management for residential communities and commercial buildings

Business Analyst *Nov 2022 - Aug 2024*

- Standardized how 5-6 teams (34 users) tracked work in Jira Cloud by building each team's workflows and permissions as an admin and training users with SOPs.
- Kept 100+ service tickets a week moving to closure, including issues from 70+ client WhatsApp groups, by scheduling 15-20 on-ground staff daily and assigning vendors same-day.
- Gave management a weekly view of SLA KPIs (breach rate, time in status) by automating a Jira dashboard and Slack alerts tagging owners of overdue tickets.
- Found the main bottleneck in that dashboard: 54% of 671 pending tickets breached SLA, and verification averaged 30 days against a target of 2 days.
- Replaced paper attendance registers at 6-7 sites with QR-code check-ins on the company ERP and Jira, giving managers verified, real-time attendance.
- Automated payroll's held-salary and full-and-final settlement tracking by moving it from spreadsheets into a Jira workflow where cases linked and closed automatically.
- Delivered 10-12 Monthly Maintenance Reports a month and standardized Facility Managers' end-of-day reports, so every client site got consistent reporting.
- Fed the business development team qualified prospects by pitching facility management services to builders and property owners and qualifying referral leads in Freshsales.
- Halved weekly review time for 150+ customer-service logs by classifying them with ChatGPT.

BYJU'S

K-12 education technology company (learning app and school programs)

Business Analyst *Aug 2020 - Oct 2022*

- Supported sales reps on 35+ school and district deals contributing to $240K+ in school revenue, building bulk-licensing packages, low-cost plans for regional schools, ROI cases, live demos, contract reviews and teacher training.
- Turned needs from school stakeholders into 50+ user stories with Given/When/Then acceptance criteria and 2-3 BRDs/FRDs per school, including the business logic for sequential topic unlocking (90% quiz score required) after feedback showed students rushing through topics.

- Helped roughly double an 11-rep team's weekly revenue within 2 months (about $4K to $9K) by retraining their pitch and objection handling, piloting it on declined leads first; trained 40+ reps overall and defined hiring criteria.
- Built Tableau and Excel KPI dashboards on call volume, target attainment and ticket resolution, and segmented leads across 7 cities by locality, income and occupation to focus outreach.

Senior Business Development Associate *Dec 2019 - Aug 2020*

- Delivered $200K+ in cumulative sales over 20 months by converting higher-value qualified leads against a larger senior quota, ranking among top performers.
- Designed tiered, market-based pricing from voice-of-customer analysis, discounting town packages about 50% and upselling city packages 3x+ with live-class add-ons.
- Owned full-cycle sales from lead to close and payment, structuring no-cost installment financing with lending partners, online payments and cashback verification.

Business Development Associate *Dec 2018 - Dec 2019*

- Generated about $100K in first-year sales through outbound prospecting, in-home product demos and referral selling, earning promotion to senior in 12 months.
- Ran post-purchase customer feedback loops with families, surfacing usage insights for the product team.

PROJECTS

AI Ops Triage Copilot (n8n + Claude API) Independent Project, 2026

github.com/ssettem/ai-ops-triage-copilot | n8n, Claude API, structured outputs, human-in-the-loop

- Built an n8n workflow that triages service tickets with Claude under a P1/P2/P3 SLA policy, sending P1s to alerts and low-confidence or repeat tickets to human review.
- Scored it on 40 hand-labeled tickets: 97.5% category accuracy, 10 of 11 emergencies caught, 100% P1 precision and a prompt-injection attempt resisted, at $0.49 per 100 tickets; traced the one miss to a gap in the rules.

90-Day Go-to-Market Roadmap: Healthcare AI Startup Business Case Study, 2026

Live site: veridian-roadmap.vercel.app | Built with Claude Code and Vercel from public Medicare data

- Applied B2B sales and sales-operations experience to design a 90-day go-to-market plan: scored 100 target accounts by fit and timing using public 2027 Medicare Star Ratings, mapped 5-person buying committees, and set targets of 20 meetings, 3 pilot proposals and 1 pilot.
- Configured Claude Code with MCP connectors and plugins for UI design, animation, web research and Vercel deployment, then built and published the plan as an interactive website with sample outreach emails, discovery questions and an ROI case for each buyer type.

F1 Cost-Cap Analytics: Forecasting & Predictive Modeling MS Capstone, Lewis University

github.com/ssettem/f1-racing-bi | R, Python, Tableau, SQL, Microsoft Word, NotebookLM (Gemini), AI coding assistants

- Led the forecasting and predictive-modeling work for a team capstone on 11 F1 seasons (2015-2025), using AI coding tools to build and test models, then selecting and interpreting the results; documented the methods in Word and used NotebookLM to plan the data story for the final presentation.
- Forecast sponsorship revenue with ARIMA (3.36% MAPE), tested the cost cap's lagged effect with Granger causality ($p = 0.02$, lag 2), and predicted championship points with Random Forest, beating a neural network (RMSE 103.5 vs 134.7).

AegisIQ Reporting Data Warehouse Graduate Coursework, Lewis University

Course case: Dota 2 coaching-analytics business, 150 staff, four sites | ER diagram, star schema

- Designed one shared reporting database for a Dota 2 coaching business, so four sites reported player performance, coaching sessions, revenue and staffing from the same numbers.
- Drew the ER diagram of tables, keys and relationships first, then built the star schema and wrote the data mapping from each source system.

EDUCATION

M.S. Business Analytics, Lewis University | GPA 3.83/4.0 *Aug 2024 - May 2026*

B.Tech, Computer Science, Jawaharlal Nehru Technological University *Dec 2018*
